

Benefits

- ➔ Point and Click
- ➔ Regulatory compliance
- ➔ Up to 80,128 bits encryption (CedeCrypt)
- ➔ FIPS 140-2 Certified
- ➔ Internal & external devices supported

File and Folder Encryption The Easy Way

Recent reports put the cost of data protection failures including investigation, notification, management, compliance and, post-incident surveillance at about £150 per record. It is widely reported that 200+ million records have been compromised or exposed to unmanaged risks in 2008 alone. Companies know that the significant costs of data loss are measured in impact on reputation and brand identity.

Laptop computers are the number one contributor to these statistics. Add to that the millions of portable memory devices in use today and it is easy to understand the imminent nature of the risk of data loss. CedeCrypt provides the highest levels of encryption available coupled with an intuitive and easy to use interface making data security just a click away.

Introducing: CedeCrypt *Classic*

File and Folder Encryption Simplified.

Why CedeCrypt?

Point and Click Simplicity

As simple as two clicks of a mouse, CedeCrypt's integration with Windows Explorer finally makes securing confidential files and folders easy. Existing solutions too complicated to be effective leave many companies just a download away from serious data breach. In an age where data protection has never been more important CedeCrypt helps the user take charge of information security.

Robust Security

Once secured by CedeCrypt's powerful encryption standard, sensitive files and folders can be stored safely, transferred over internal networks, copied to any other media or transferred over the web. CedeCrypt also employs DOD standards for securely erasing data ensuring that original un-encrypted data cannot be recovered using third party tools.

Universal Text Encryption

Universal Text Encryption capabilities make securing the text of e-mails, instant messages and other documents straightforward.

Easy To Deploy Across Organisations

While competitors may be expensive and time consuming to install and deploy, CedeCrypt is competitively priced, installs in seconds requiring little disk space or memory and has little impact on work environments or on performance. Available as an instant download and with a distribution wizard for large organisations CedeCrypt is the encryption solution of choice.

Protect Your Existing Portable Memory Devices

CedeCrypt allows you to secure any method of storage. Encrypt your files and folders on Laptops, Network shares, Flash Drives, Removable Hard Drives, CD's and DVD's. Perhaps you store data using online data storage or public FTP sites, but want to ensure your data is kept safe from prying eyes? Encrypt your data using CedeCrypt and feel safe knowing that no matter where your encrypted files are stored - only you are able to gain access.

CedeCrypt – effective security made simple.

For more information please visit our web site below:

Requirements:

Windows 2000, Windows XP / Professional (all versions)

Windows 2003, Windows Vista (all versions)

USB 2.0 compliant device (optional) and USB 2.0 port.

Other CedeSoft Products:

CedeSafe - Real-time hard disc encryption for your files.

CedeTracker - Centralised logging of PC activity and IP traffic.

CedeCom - Secure messaging (IM) and broadcast facility for the enterprise.

CedeSMS - Secure mobile messaging for existing devices.
